

SUPPORT GORAIL

Strengthen Freight Rail from the Ground Up

GoRail is a national non-profit dedicated to building public and political support for policies that enable robust private investment in freight rail. Since 2004, we've worked with thousands of mayors, county commissioners, economic developers, and other community leaders to share the local benefits of rail with policymakers in Washington—stronger economies, more jobs, and cleaner skies.

OUR ORGANIZING IS TWOFOLD:

01

Grasstops Advocacy

Engages influential local leaders who speak directly to Congress and the Administration about the importance of freight rail in their communities.

02

Grassroots Engagement

Mobilizes thousands of citizen advocates across the country to take action on key federal policy issues that affect rail investment and operations.

Thanks in part to GoRail's work, the industry has secured major wins in recent years—including sustained Congressional support for balanced regulation, historic levels of federal grant funding for grade crossing safety, and robust public opposition to unworkable state-level mandates like California's proposed zero-emission locomotive rule.

Why Your Support Matters

Rail suppliers and contractors have a critical stake in these outcomes. Federal policies that promote private investment and oppose overregulation help sustain the capital-intensive environment that benefits the entire freight rail supply chain. Your voice—and your partnership—makes our message stronger.

GoRail offers several donor appreciation events that bring together Class I and regional railroad executives, including networking opportunities with senior sourcing officers and industry leaders. These gatherings provide unmatched access, insight, and relationship-building opportunities with the people shaping the future of freight rail.
